(54) **PERCUTANEOUS ABSORPTION PREPARATION**

(57) Abstract:

PURPOSE: To obtain a percutaneous preparation which can release indomethacin effectively and permit efficient absorption through skin into the living body.

CONSTITUTION: The percutaneous absorption

preparation is produced by coating the substrate with a layer comprising a rubber base of at least one of natural or synthetic rubber, a tackifier resin, indomethacin and isopropyl myristate on its one surface where the amount of isopropyl myristate is 5 to 500 pts.wt. per 100 pts.wt. of the base.
